

The ocean holds so much beauty and wonder, and it's up to us to protect it and its inhabitants. Let's continue to cherish and appreciate these priceless moments, and work towards preserving them for generations to come. In Mauritius, there are usually two different species of whales : sperm whales that reside year-round and live far away at sea. And humpback whales, which only migrate to our shores from May to September to feed and protect newborns or calves. We will watch humpback whales or sperm whales in their natural environment according to the season and our luck that day. The trip will last about 3 hours, based on their location. Patience is key with the whales. Please note that there is a possibility that we may not see whales, but we use a hydrophone to locate them.

Location	West coast of Mauritius	
Minimum age	N/A
