

Discover the endemic fauna and flora of Mauritius on a protected area in Chamarel. More than 80 species of endemic trees have been discovered on the estate, among them species declared highly endangered: 'pungent palm kernel', 2 species of 'ebony', 'wood nail' and 'brown coffee'. At its own pace, on prepared trails or under the guidance of a specialized guide, we discover several varieties of endemic trees and, if we are lucky, rare birds like the rooster of the woods (*terpsiphone bourbonnensis*), the cook (*coracina typica*) or the pink pigeon (*columba mayeri*). Another way, more playful and sporty, to immerse yourself in the heart of this Mauritian protected nature is to perform a course of archery on 3D targets - how to combine ride, challenge and precision. Fans of sensations will opt for a 260-meter-long zip-line over a canyon, followed by a vertiginous Nepali bridge of more than 200 meters set x meters high.
